

Magic that makes you smile in the morning haha!

Witch's healthy French toasts

When you get tired and eat less, your stomach becomes weaker and your whole body recovers much slower.

Toast has alpha-gelatinized starch and is actually an easily digestible food.

Furthermore, French toast is rich in nutrients such as protein, high-quality fats, carbohydrates, vitamins A, B, C, D, E, and K, sodium, potassium, calcium, magnesium, phosphorus, iron, zinc, copper, iodine, selenium, and molybdenum.It's like a magic spell hahaha

Also, our witch's French toast has a "secret vanilla" flavor.

This ingredient approaches your mind and body. It works on your nerve center and relieves stress, irritation, tension, insomnia, etc. It has the function of promoting gas discharge from the intestines, and has anti-infective, antioxidant, menstrual promotion, and nourishing tonic effects.

Research has proven that vanilla's sweet, rich aroma tricks the human sense of taste, and that even if you use less sugar, it still tastes just as sweet.

Desserts that use vanilla are said to be more effective for weight loss than other desserts that rely solely on the sweetness of sugar.

Have fun and enjoy nutritious meals, and stay healthy at all times.

and make them just for you!(Vegan, Allergies etc)

WHY NOT? DAY DRINKING

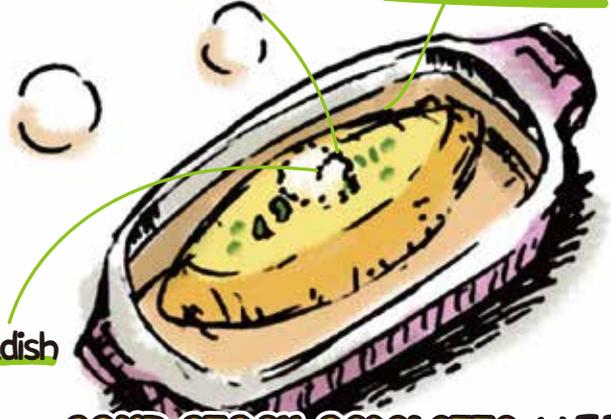

Dear drinker. When you drink alcohol at NIGHT, your stomach breaks down the alcohol, impairing the quality of your sleep which is an important factor in lowering blood pressure. You can drink alcohol during the day to avoid stress. And if you have a minute, move around and feel refreshed. Please sleep when you want to sleep for giving your blood vessels a rest. In fact, such a lifestyle is the BEST QOL for lowering blood pressure for modern people who have a lot of stress in their daily lives.
